

While the rain we have been receiving is much needed, it has slowed down progress with our road crews. This week, we will be ripping up King Road, east of Tony Creek - mainly in the areas where water has washed out the road. We will also be working in the area of Pond Lane, heading east. The next task for the week will be applying the overlay on Miller Road.

All of this will be weather permitting. In the event we do receive more rain, crews will continue to go over recycled roads with more water and gravel to continue to keep the foundation hard prior to the overlay. As the weather begins to heat up, we will aggressively begin the oil and chip process.

Thank you for your patience as we continue to improve the county roads. Please pay attention to warning signs and be aware of crews on the roads.
